

How to measure your room:

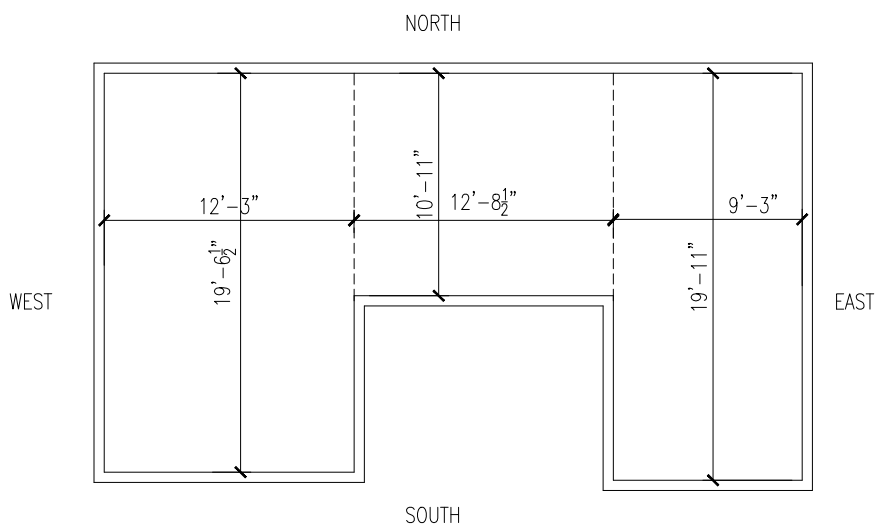

DISTINCTIVE INTERIORS
Creating Stylish Living

Draw a floorplan of your room.

Label each wall North, South, East & West. (If you are not sure the sun rises in the East and sets in the West).

Measure the length of the room down the center and do the same for the width of the room. Indicate the measurements on your floorplan.

If you have a complex or odd shaped room, divide the room into sections (making blocks) and measure width and length.

Additional Measurements:

Ceiling Height: _____

in a corner of the room, measure from the floor to the ceiling to give us your ceiling height.

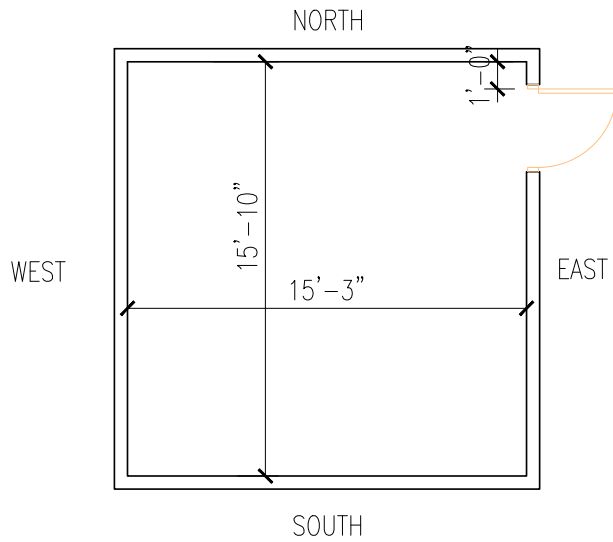

Typical Window Height: _____

measure from top of glass to floor.

Adding Door Location(s):

DISTINCTIVE INTERIORS
Creating Stylish Living

Show Door location and whether it swings in or out of the room. If you can provide a dimension from the wall to the door opening that is helpful.
